Family Tree Creator Application

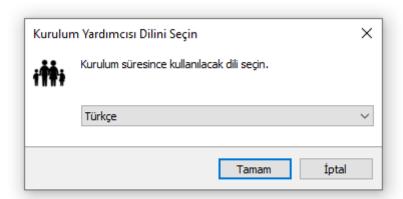

Welcome to help document of family tree creator application. This document prepared for giving information about the application.

Family Tree Creator is an Windows desktop application that can create family trees. This family trees designed as editable.

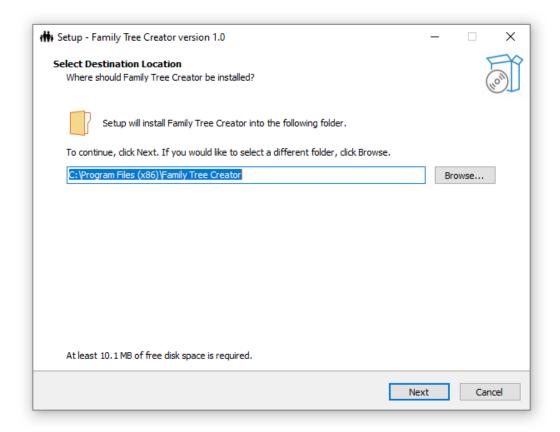

• Installation

Firstly open FamilyTreeCreatorInstaller as administrator.

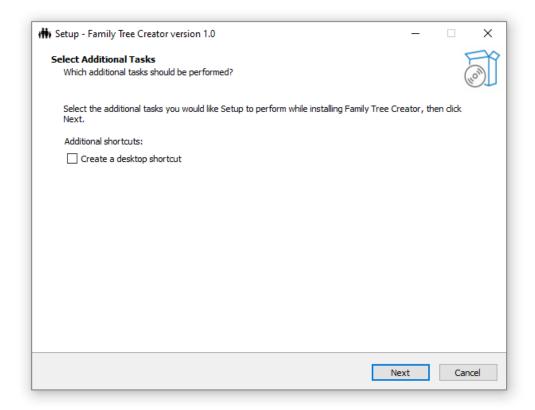

Select language for installation process.

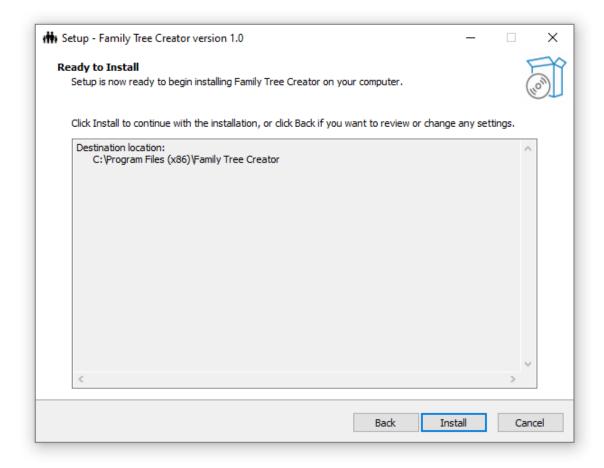

Select installation location.

If you want a shortcut to desktop click the radiobutton, then click next.

Finally click install to finish installation.

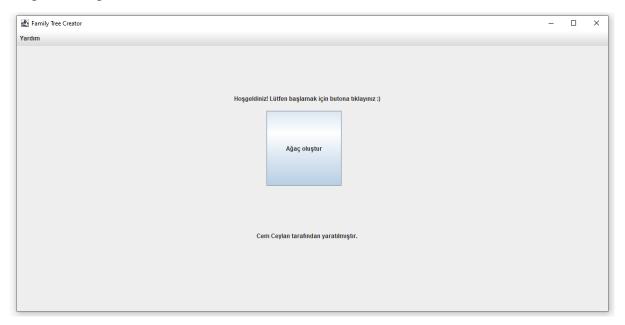

• The Application

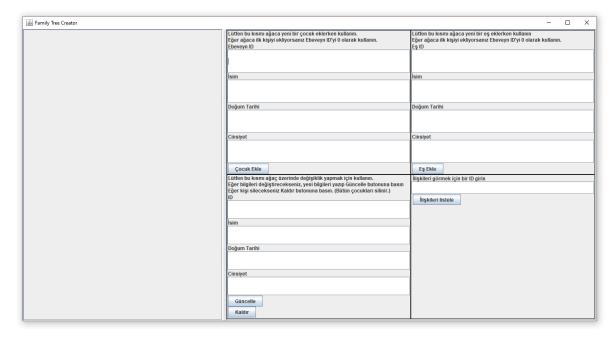

Click FamilyTreeCreator and open the application. When application open a home page will show up.

Click "Create Tree" button to start creating family trees.

Help button opens this document.

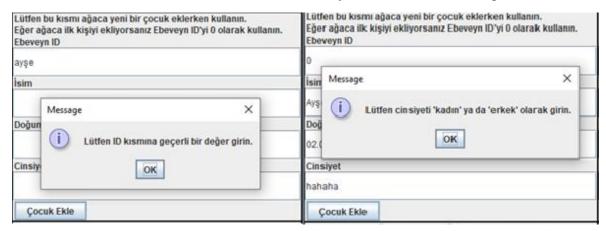

After clicking the button the main page will be open. This page is the page that creates family trees. This page has 4 different area.

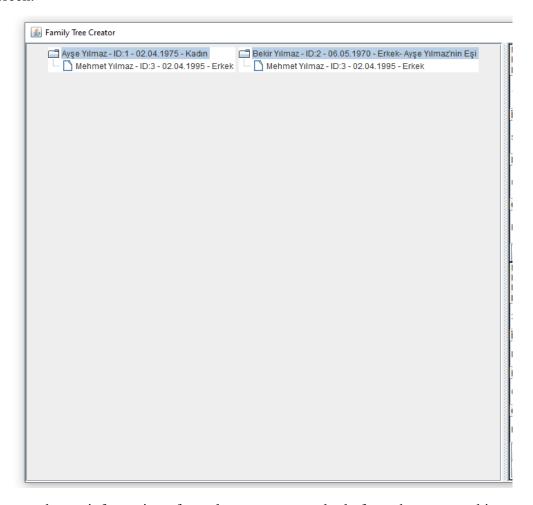

These two area are using for building tree. If you are adding a child to the system use left area. If you are adding a spouse (like marriage relationship) use right area. You have to specify which person will be parent or spouse with their ID. You can see peoples ID's on the tree. If you adding first person to the tree, use ID as 0. You can use left or right area for adding first person.

	Lütfen bu kısmı ağaca yeni bir çocuk eklerken kullanın.	Lütfen bu kısmı ağaca yeni bir eş eklerken kullanın
	Eğer ağaca ilk kişiyi ekliyorsanız Ebeveyn ID'yi 0 olarak kullanın.	Eğer ağaca ilk kişiyi ekliyorsanız Eş ID'yi 0 olarak kullanın.
	Ebeveyn ID	Eş ID
	İsim	İsim
	Doğum Tarihi	Doğum Tarihi
	Cinsiyet	Cinsiyet
	Cocuk Ekle	Eş Ekle
9	ÇOCUK EKIE	EŞ EKIE

You have to enter correct values for each field. Or you can see error messages like these:

After start adding people to the tree, you will able to see the tree visually on the left side of screen.

If want to change information of people or remove anybody from the tree use this area.

Lütfen bu kısmı ağaç üzerinde değişiklik yapmak için kullanın.		
Eğer bilgileri değiştirecekseniz, yeni bilgileri yazıp Güncelle butonuna basın		
Eğer kişi silecekseniz Kaldır butonuna basın. (Bütün çocukları silinir.)		
ID ,		
İsim		
Doğum Tarihi		
Cinsiyet		
Güncelle		
Kaldır		

If you change information of somebody you can visitually see the change on the tree. To able to change informations you have to re-enter all information again click "Güncelle" button.

If you want to remove someone from the tree entering his/her ID is enough. The application would remove him/her. Be careful, the application would also remove all children of him/her and him/her spouse.

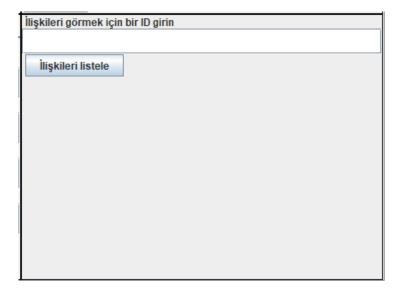

For example lets remove Mehmet Yılmaz from the following tree:

Ayşe Yılmaz - ID:1 - 02.04.1975 - Kadın - Mehmet Yılmaz - ID:3 - 02.04.1995 - Erkek - Gamze Yılmaz - ID:5 - 09.01.2019 - Kadın	☐ Bekir Yılmaz - ID:2 - 06.05.1970 - Erkek- Ayşe Yılmaz'nin Eşi	Sude Yilmaz - ID:4 - 05.11.1996 - Kadın-Mehmet Yılmaz'nin Eşi

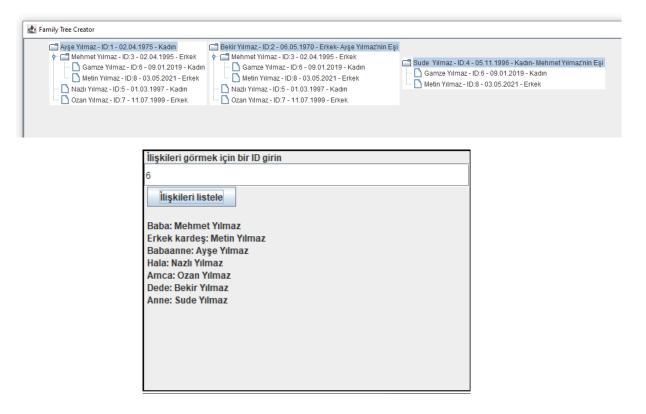

After removing, as you can see his child and spouse also removed from the tree.

The fourt area is using for listing all kinships. When you enter a person's ID, the program would show you his/her all kinships in the tree.

For example lets list kinships for Gamze Yılmaz from the following tree:

If you need any help please reach me from github. You can find my github profile and the source code of the application in the "Yardım" section.
